Single modular approval. Output power listed is conducted. The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter, except in accordance with FCC multi-transmitter product guidelines. End-users and installers must be provided with antenna installation and transmitter operating conditions for satisfying RF exposure compliance.

Class II permissive change: Integrated this modular into host platform using dipole antenna approved in this filing. The highest reported SAR for stand-alone transmission exposure conditions is 0.69 W/kg. SAR compliance has been established in the host product(s) with slot configurations as tested in this filing, and can be used in host product(s) with substantially similar physical dimensions, construction, and electrical and RF characteristics. End-users must be provided with specific information required to satisfy RF exposure compliance for all final host devices. Compliance of this device in all final host configurations is the responsibility of the Grantee.
